

## "Krash Out Index" (KOI) App Concept

### Theme:

A playful, meme-driven mental health and productivity tracker inspired by the symbolism of the koi fish—representing perseverance, balance, and transformation<sup>[1] [2]</sup>. The app uses a circular "lock in / crash out" cycle (as in your image) to visualize user habits, with results delivered as custom koi-themed memes.

## Core Features

### 1. Questionnaire-Based Input

- Users answer daily/weekly questions about:
  - Hours spent working, studying, or being productive ("locked in")
  - Hours spent relaxing, sleeping, binge-watching, or "crashing out"
  - Mood and energy levels
  - Optional: Social activity, exercise, creative time

### 2. KOI (Krash Out Index) Calculation

- The app calculates a "KOI score" based on the ratio of "lock in" to "crash out" activities.
- The score places users somewhere on the circular spectrum:
  - **Mostly Locked In:** High productivity, low downtime
  - **Balanced:** Healthy mix
  - **Mostly Crashed Out:** Lots of downtime, low productivity

### 3. Meme Result Generator

- Based on the KOI score, the app generates a koi-themed meme:
  - **Chill Koi:** "I'm just a chill guy" (for balanced or relaxed users)
  - **Hustle Koi:** "Grinding upstream like a legend" (for high productivity)
  - **Sleepy Koi:** "Couch potato mode: activated" (for high crash out)
  - **Zen Koi:** "Balanced like a true koi—swimming with the flow"
- Each meme features a cute or funny koi illustration, possibly with pop culture references or trending meme formats<sup>[3] [4]</sup>.

### 4. Progress Visualization

- The circular diagram (from your image) animates to show the user's current position on the lock in/crash out cycle.

- Users can track their KOI score over time.

## 5. Shareable Content

- Users can share their KOI meme results on social media.
- Option to save or remix memes.

## Koi Fish Symbolism Integration

- **Koi as Mascot:** The app's mascot is a koi fish, symbolizing perseverance, balance, and transformation<sup>[1] [2]</sup>.
- **Visuals:** Use vibrant, playful koi illustrations swimming around the lock in/crash out circle.
- **Motivational Messages:** Draw from koi legends—e.g., "Swim upstream, become a dragon!" for users making progress<sup>[1] [2]</sup>.

## Example User Flow

1. **Open App:** Greeted by animated koi swimming in a circle.
2. **Answer Questions:** "How many hours did you spend working today?" "How much time did you spend relaxing?"
3. **Get KOI Score:** App calculates and animates your position on the circle.
4. **Receive Meme:**
  - If balanced:
    - > Chill Koi Meme: "I'm just a chill guy, floating through life."
  - If overworked:
    - > Hustle Koi Meme: "Grinding upstream like a legend!"
  - If crashed out:
    - > Sleepy Koi Meme: "Couch potato mode: activated."
5. **Share or Save:** Option to share meme or view progress history.

## Technical/Design Suggestions

- **Survey App Tools:** Use platforms like Open As App or Google Forms for prototyping the questionnaire<sup>[5]</sup>.
- **Meme Generation:** Integrate a meme generator API or use AI-powered meme creation tools for dynamic, personalized memes<sup>[3] [4]</sup>.
- **Art Assets:** Commission or generate koi illustrations (can use AI art tools for prototyping).
- **UI/UX:** Keep the interface playful, simple, and visually engaging—focus on the circular cycle and koi animations.

## Next Steps

- **Wireframe the app:** Sketch the main screens (questionnaire, results, meme display, progress tracker).
- **Design koi meme templates:** Create a few base meme images for each KOI score category.
- **Build MVP:** Use a no-code app builder for the survey and meme display, or prototype in Figma/Adobe XD<sup>[4]</sup>.
- **Test with users:** Gather feedback on meme humor, app flow, and engagement.

## Summary:

"Krash Out Index" is a lighthearted, koi-themed app that helps users reflect on their productivity and downtime, delivering personalized meme results to encourage balance and self-awareness—rooted in the koi's symbolism of perseverance and transformation<sup>[1] [2]</sup>.
